

 Trislot[®]

Screens for the
Beer Industry

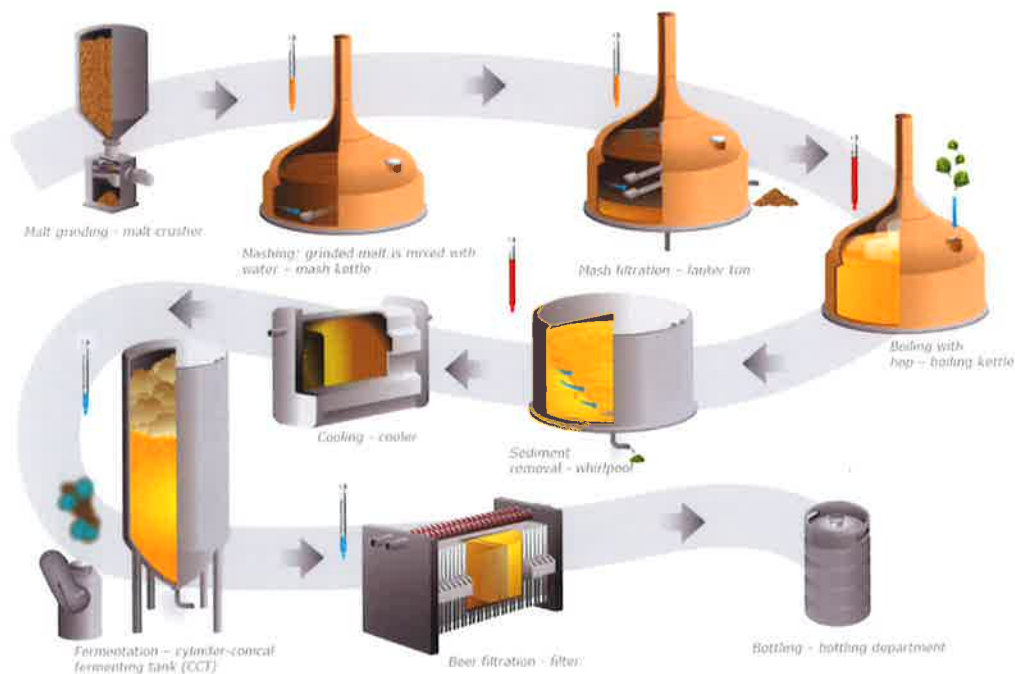

ABOUT US

As Belgians, it is fair to say that we take our beer seriously. With over 30 years of experience Trislot knows the ins and outs of the beer industry. Trislot screens and tubes are used in multiple steps of the beer brewing process such as: Malting, Lautering, Hop infusion and of course filtration itself.

Trislot® designs and manufactures stainless steel filter elements and separation screens based on V-shaped profile wires. These high precision filtration elements are made from profile wires that are resistance welded onto support wires in an automated production process.

Our leading edge production technology, innovative design from our engineering staff and close cooperation with our customers assures you to have a cost-effective, tailor made solution for all your filtration and screening needs.

THE BREWING PROCESS

/ Lauter tun screens

Product specifications:

- Smaller diameters: rectangular segments
- Larger diameter: pie shaped segments
- Diameters from 0,5m up to 12m

Wedge wire specifications:

- Slot opening: 0,5 - 0,75 mm
- Surface profile: 22S - 28S - 34S
- Support profile: 10x3 - Q35
- Open area: 20% up to 30%
- Mainly AISI 304 in some cases AISI 316L

BELGIAN QUALITY

Strengths:

- Self supporting
- Ready to go design
- Custom built
- We have solutions for all types
- Perfectly flat screens
- Interlocking
- High open area
- Good cleanability

**Completely
finished, ready
to go design!**

// Hop baskets

Product specifications:

- Custom built
 - Dry hopping, hop pallets, cold side, warm side...
 - Hygienic design
 - Cylinders: axial slots
- OR
- Reversed rolled slottubes: radial slots
 - Diameters between 150mm and 900mm
 - Slot opening: 50 μ - 300 μ

/// Precoat candle filters

Product specifications:

- OD 25mm - 32,5mm
- Various lengths
- Slot: 30 μ - 70 μ
- Material: 316L
- 12S/Q25
- open area of 3 - 6.5%

Strengths:

- Market leader
- Slot consistency
- Perfect round tubes
- Durability
- Backflush-ability
- Short turn-around time
- High filtrate quality
- Low maintenance
